Congratulations

A. Bolu Ajiboye, PhD, and Robert Kirsch, PhD

2018 International Annual BCI-Research Award

The Cleveland FES Center congratulates A. Bolu Ajiboye, PhD, and Robert Kirsch, PhD on receiving the 2018 International Annual Brain Computer Interface (BCI) Research Award, for their project entitled “Restoring Functional Reach-to-Grasp in a Person with Chronic Tetraplegia using Implanted Functional Electrical Stimulation and Intracortical Brain-Computer Interfaces.”

The Brain Computer Interface Award is one of the highest achievements in BCI research. It is an annual award organized by the BCI Foundation recognizing outstanding and innovative research in the field of Brain-Computer Interfaces.

About the FES Center

The Cleveland FES Center is a consortium of the Louis Stokes Cleveland VA Medical Center, MetroHealth Medical Center, Case Western Reserve University, University Hospitals, and the Cleveland Clinic Neurological Institute. With their support, researchers, engineers and clinicians collaborate together to develop innovative solutions that improve the quality of life of individuals with neurological or other muscular skeletal impairments. Through the use of neurostimulation and neuromodulation research and applications, the Cleveland FES Center leads the translation of this technology into clinical deployment.
