Congratulations to Dennis Bourbeau, PhD on receiving a 2016 Society of Urodynamics, Female Pelvic Medicine & Urogenital Reconstruction (SUFU) Research Foundation grant for the study of Neuromodulation. The 2 year grant is entitled, "Automated closed-loop stimulation to inhibit neurogenic bladder overactivity."

The purposes of this Society are to improve the art and science of Urology through basic and applied clinical research in urodynamics and neuourology, voiding function and dysfunction, female urology and pelvic floor dysfunction, and to disseminate and teach these concepts.

About the FES Center
The Cleveland FES Center is a consortium of the Louis Stokes Cleveland VA Medical Center, MetroHealth Medical Center, Case Western Reserve University, and University Hospitals. With their support, researchers, engineers and clinicians collaborate together to develop innovative solutions that improve the quality of life of individuals with neurological or other muscular skeletal impairments. Through the use of neurostimulation and neuromodulation research and applications, the Cleveland FES Center leads the translation of this technology into clinical deployment.
