

Neural Prosthesis Seminar

Oculeve Incorporated Neurostimulation Therapy for Dry Eye & Spinning Out a Med-Tech Start-up from a University

Friday, October 2, 2015 • 8:30 AM

Tinkham Veale Senior Classroom, Room 134
Case Western Reserve University

D Michael Ackermann, PhD

President and CEO
Oculeve Incorporated

Abstract

Oculeve Incorporated was founded from the Stanford University Biodesign program in 2012. The company developed a neurostimulation therapy for dry eye disease, which has since been approved in Europe, Canada and Australia. The product is currently undergoing its US pivotal trial, and the company was recently acquired by Allergan, Inc. The lecture will tell the Oculeve story with focus on the spin-out from the University.
