

Congratulations
Kevin Kilgore, PhD

NIH Research Project Grant Program (R01)

The Cleveland FES Center congratulates Kevin Kilgore, PhD on receiving an R01 award from the National Institutes of Health (NIH) National Institute of Biomedical Imaging and Bioengineering (NIBIB). His project is entitled, "Enhanced Modular Neuroprosthesis for the Restoration of Function in Neurological Injury or Disease."

Dr. Kilgore seeks to advance the Networked Neural Prosthesis (NNP) System to impact a broader patient population, improve users to access the technology, and enable the transfer of the technology to the real-world clinical setting.

About the FES Center

The Cleveland FES Center is a consortium of the Louis Stokes Cleveland VA Medical Center, MetroHealth Medical Center, Case Western Reserve University, University Hospitals, and the Cleveland Clinic Neurological Institute. With their support, researchers, engineers and clinicians collaborate together to develop innovative solutions that improve the quality of life of individuals with neurological or other muscular skeletal impairments. Through the use of neurostimulation and neuromodulation research and applications, the Cleveland FES Center leads the translation of this technology into clinical deployment.
