

CONGRATULATIONS KEVIN KILGORE, PHD

METROHOUSE BREAKS GROUND SPRING 2017 OPENING

Kevin Kilgore's passion for pioneering solutions for individuals with spinal cord injuries (SCI) goes beyond the laboratory. As one of the funded proposals in MetroHealth's 2015 "Think Tank", an employee competition of innovative ideas that would improve both MetroHealth and the surrounding community, MetroHouse will be a new residential center for SCI patients undergoing treatment at the FESC laboratories at MetroHealth Old Brooklyn Campus.

MetroHouse is a 7000 sq ft home that will include 5 patient suites and 2 innkeeper apartment. Out of town patients and their families will have access housing with on-site support for needs specific to the SCI community.

MetroHouse was designed and is being constructed with the generous support and donation of Miguel Zubizarreta.

Follow the MetroHouse progress at www.FEScenter.org/MetroHouse.

About the FES Center

The Cleveland FES Center is a consortium of the Louis Stokes Cleveland VA Medical Center, MetroHealth Medical Center, Case Western Reserve University, and University Hospitals. With their support, researchers, engineers and clinicians collaborate together to develop innovative solutions that improve the quality of life of individuals with neurological or other muscular skeletal impairments. Through the use of neurostimulation and neuromodulation research and applications, the Cleveland FES Center leads the translation of this technology into clinical deployment.
