

Congratulations
Jeffrey Capadona, PhD

Professor of Biomedical Engineering
Case Western Reserve University

The Cleveland FES Center congratulates Jeffrey Capadona, PhD on being promoted to Professor of Biomedical Engineering at Case Western Reserve University.

Dr. Capadona is an investigator at the Cleveland FES Center, APT Center, and Research Health Scientist at the Louis Stokes VA Medical Center. His lab is studying various aspects of microelectrode performance, and pursuing both materials-based and therapeutic-mediated methods to mitigate the inflammatory-mediated microelectrode failure mechanisms.

About the FES Center

The Cleveland FES Center is a consortium of the Louis Stokes Cleveland VA Medical Center, MetroHealth Medical Center, Case Western Reserve University, University Hospitals, and the Cleveland Clinic Neurological Institute. With their support, researchers, engineers and clinicians collaborate together to develop innovative solutions that improve the quality of life of individuals with neurological or other muscular skeletal impairments. Through the use of neurostimulation and neuromodulation research and applications, the Cleveland FES Center leads the translation of this technology into clinical deployment.
