

Congratulations

Dominique Durand, PhD

Distinguished University Professor
Case Western Reserve University

The Cleveland FES Center congratulates Dominique Durand, PhD on being awarded the title of "Distinguished University Professor" at Case Western Reserve University — a permanent, honorific title that acknowledges contributions of full-time, tenured faculty with exceptional records of research, scholarship, teaching and service.

Dr. Durand's research interests are in neural engineering and include computational neuroscience, neurophysiology and control of epilepsy, non-linear dynamics of neural systems, neural prostheses and applied magnetic and electrical field interactions with neural tissue.

"Dominique Durand's contributions to scholarship, research community, students and the university are truly remarkable," says Robert Kirsch, PhD, Executive Director, Cleveland FES Center and Chair, Biomedical Engineering. "His research is world-renowned, has trained a large number of students who are now leaders in academia and industry, is an accomplished teacher and is a dynamic citizen of the academic community."

About the FES Center

The Cleveland FES Center is a consortium of the Louis Stokes Cleveland VA Medical Center, MetroHealth Medical Center, Case Western Reserve University, University Hospitals, and the Cleveland Clinic Neurological Institute. With their support, researchers, engineers and clinicians collaborate together to develop innovative solutions that improve the quality of life of individuals with neurological or other muscular skeletal impairments. Through the use of neurostimulation and neuromodulation research and applications, the Cleveland FES Center leads the translation of this technology into clinical deployment.
