CONGRATULATIONS

MetroHealth’s Old Brooklyn Campus
$9M Renovations

“Miracles happen every day with our rehabilitation patients, who re-learn how to walk, talk and live their lives after traumatic events. This investment in our Old Brooklyn Campus will allow us to strengthen these rehabilitation programs and better serve our patients.”

— Akram Boutros, MD —
MetroHealth President and CEO

The MetroHealth System will invest $9M to renovate the Physical Medicine and Rehab (PM&R) research program, which includes the Cleveland Functional Electrical Stimulation (FES) Center. Demolition has already begun and the work is projected to be completed halfway through 2021.

About the FES Center
The Cleveland FES Center is a consortium of the Louis Stokes Cleveland VA Medical Center, MetroHealth Medical Center, Case Western Reserve University, University Hospitals, and the Cleveland Clinic Neurological Institute. With their support, researchers, engineers and clinicians collaborate together to develop innovative solutions that improve the quality of life of individuals with neurological or other muscular skeletal impairments. Through the use of neurostimulation and neuromodulation research and applications, the Cleveland FES Center leads the translation of this technology into clinical deployment.
